

NUCLEAR ENERGY AWARDS

Written by Fancy and Jade

The delegates of Nuclear Energy have all done an amazing job and a few have even achieved some honorable awards. The well-deserved winners are: Erik, Elise, Aleksander and Dalen.

Delegate Erik Haxhia did not anticipate that he'd win the 'Best Diplomat' award, thus he felt very surprised. He found it intriguing that he could find connections between people in this conference, therefore he expressed his passion for this MUN experience. He priorly discovered in the conference from last year that he wants to enroll in diplomacy section in the future, and this conference added to this idea, especially with the awards he received which strengthened his belief.

Elise Godfried also was shocked that she won the awards for 'Best delegate'. She felt even more joyful because of this surprise. During the solution voting, she understood how to make people agree on the solution proposed but she found it hard to actually do it. She personally enjoys debating, and for this conference she liked debating nuclear energy, despite the fact that it was not her first choice.
